Among the notable wildflowers that grace the foothills are:

- **Arrowleaf Balsamroot:** This striking perennial boasts large, golden-yellow flowers and woolly leaves.
- **Blue Lupine:** With its showy blue to purple flower spikes, this wildflower adds a touch of elegance to the landscape.
- **Scarlet Gilia:** This vibrant flower blooms in shades of scarlet and orange, attracting hummingbirds and insects alike.
- **Common Stonecrop:** This low-growing succulent features fleshy leaves and clusters of star-shaped yellow flowers.

As you ascend the slopes, the foothills transition into majestic forests, where towering trees and lush undergrowth create a verdant canopy overhead. The forests are home to a diverse range of conifers, deciduous trees, and other plant species.

Some of the iconic trees found in the forests include:

- **Douglas Fir:** This evergreen conifer is known for its majestic height and graceful branches.
- **Western Larch:** With its golden-yellow foliage in the fall, this deciduous conifer adds a splash of color to the forest.
- **Quaking Aspen:** These trembling trees create a shimmering effect with their leaves that flutter in the wind.

- **Bitter Cherry:** This understory tree produces clusters of fragrant white flowers and edible cherries.

This field guide provides detailed descriptions and high-quality photographs of over 100 common plant species found in the Boise Foothills and Forests. With a user-friendly format, you can easily identify plants based on their:

- Flower shape and color
- Leaf characteristics
